

Life Safety has been helping protect people and property since 1994. We offer a broad range of services and programs designed to meet the specific needs of each facility we service. Our highly trained staff can service all types of suppression and fire alarm systems, regardless of the size, complexity, or *system manufacturer*. We strive to deliver service that exceeds our customer's expectations.

Our multi-location account program is designed to meet the unique service requirements of our customers who have sites across North America. We can help you streamline the maintenance of your systems and comply with local codes and regulations.

- Single Point of Contact
- Standardized Service Billing

## SINGLE SOURCE FOR LIFE SAFETY SYSTEM SERVICES

### Preventive Maintenance Programs

We can customize a preventive maintenance program that provides you with a single source for all of your life safety systems. A service representative will meet with you and develop a service plan to ensure your systems are tested, inspected and maintained to keep them operating at peak performance. Your service agreement may include inspections, testing, parts replacement, emergency services, repair, maintenance or other services we provide.

Upon completion we will provide you with detailed documentation as outlined by the National Fire Protection Association, OSHA, and your local authority.

### Fire Suppression System Service

Our service technicians are well versed in the inspection, maintenance, and repair of all types of fire suppression systems. All of our technicians are manufacturer trained, licensed, and certified.

- Sprinkler Systems
- Fire Pumps
- Special Hazard Systems
- Portable Fire Extinguishers

### Fire Alarm System Service

The most current techniques and equipment are utilized on every inspection to meet the rigorous requirements of today's complex fire alarm systems. We make a special effort to thoroughly test and inspect all of your systems components for proper operation. We can significantly reduce unwanted false alarms by keeping your smoke detectors clean and ready to respond to the required sensitivity level.

### Security System Service

We have established a successful track record in designing and installing integrated security systems. Our technicians are experienced in servicing the access control, intrusion, closed circuit television and communications systems that protect your buildings and their occupants from any unwanted entry and theft prevention.

### Monitoring Service

In order to provide you with a greater level of protection our Central Station Monitoring service is supported by a UL and Factory Mutual Certified facility. Our professional operators are trained to identify incoming alarms and notify the appropriate authorities and responsible individuals needed for response. Our monitoring center is on the job when you can't be.

### Service 24-hours A Day

Life Safety service representatives are on call and available 24/7 for prompt dispatch to your facility. We will develop a plan to deliver the needed level of response so you'll know your people and property are protected around the clock.
